📍 Station Road, Mirusuvil, Jaffna.

Professional Summary

Detail-oriented and motivated Quality Assurance Engineer with hands-on experience in manual and automated testing within Agile environments. Experienced in API testing and automation, Load testing, and Regression testing using tools such as Postman, Katalon Studio, JMeter, Playwright with Python, TestRail, and Jira. Strong in test case design, defect tracking, and release support, with a focus on delivering high-quality software through structured testing and continuous improvement.

Technical Skills

- Testing Types : *Manual Testing, Functional Testing, Regression Testing, UI Testing, API Testing, Performance Testing*
- Test Management : *Test Case Design, Test Planning, Requirement Analysis, (Requirement Traceability Matrix) RTM, Bug Tracking*
- Automation : *Test Automation, API Automation, Regression Automation*
- Tools: *Postman, Katalon Studio, JMeter, TestRail, Jira, Playwright, Selenium WebDriver*
- QA Concepts: *Agile, Scrum, SDLC, STLC*
- Programming: *Java, JavaScript, Python*
- Version Control: *Git*

Work Experience

Codelantic

Apr 2025 – Nov 2025

Quality Assurance Intern

- Analysed business requirements and user stories to design comprehensive test plans, test scenarios, and 100+ test cases.
- Performed smoke, sanity, functional, regression, UI, exploratory, and end-to-end testing for web applications.
- Executed regression cycles to support releases and ensured test readiness and completion before sign-off.
- Identified, logged, and tracked 20+ critical and high-severity defects in Jira with clear steps, evidence, and priority classification.
- Collaborated closely with developers during bug triaging, root cause analysis, re-testing, and verification of fixes.
- Designed and maintained automation scripts for regression testing using Katalon Studio, Selenium, and Selenium (Java).
- Automated 35+ API test scenarios, validating request/response data, status codes, and business logic.
- Conducted performance and load testing using JMeter with up to 300 virtual users to identify system bottlenecks.
- Maintained Requirement Traceability Matrix (RTM) to ensure full test coverage.

Education

Bachelor of Science (Hons) in Industrial Information Technology
Uva Wellassa University of Sri Lanka

Sept 2021 – Expected 2026

Soft Skills

- Problem Solving
- Critical Thinking
- Quick Learning
- Effective Communication
- Time Management
- Collaboration
- Adaptability

Projects

Garage Management Website

Apr 2025 - Nov 2025

- Web-based system for managing garage operations including spare parts, services, clients, vehicles, job status, quotations, receipts, and payments.
- Supported four user roles: Admin, Vendor, User, and Technician.
- **Role:** Intern Quality Assurance
- **Responsibilities:** API testing, API automation, API load testing, functional testing, UI testing, regression testing (automation), test case writing and execution, RTM mapping, bug reporting and tracking.

Academic Projects

Final Year Research

Oct 2024 - Oct 2025

- Improved Learning Management System Design on Student Motivation and Engagement for Government Universities in Sri Lanka.

Personalised Nutrition Mobile Application (Group Project)

2024

- Performed functional, regression, and UI testing on all user flows.

Knowledge Sharing Web Application (Group Project)

2023

- Tested content upload/download, performed system testing and cross-browser testing.

Electricity Billing System (Group Project)

2022

- Validated data accuracy and billing logic through functional and data validation testing.

Online Bus Booking System (Group Project)

2022

- Conducted UI, usability, and cross-browser testing for booking workflows.

Class Management System (Group Project)

2022

- Verified report generation accuracy through logic validation and functional testing.
